## INTERNATIONAL YEAR OF LIGHT 2015

The glow of a candle, the rise of the Sun, and the illumination of a lamp are things that can bring comfort and warmth to our lives. Humans are, after all, drawn to light. But there is much more to light than meets the eye. Light takes on many forms that are largely invisible and undetectable without modern technology. Light allows us to communicate, entertain, explore, and understand the world we inhabit and the Universe we live in. This exhibition series will show the myriad of things light can do, and how it plays a critical role in our lives every day.

Together with SPIE (the international society for optics and photonics), the Chandra X-ray Center/Smithsonian Astrophysical Observatory are leading Light: Beyond the Bulb for the International Year of Light 2015 (IYL2015). IYL2015 was declared by the United Nations and is supported by UNESCO. Email: [iyl@cfa.harvard.edu](mailto:iyl@cfa.harvard.edu)
